### Description

Theft Aware is a very useful tool that is the nightmare for mobile phone thieves. Once thieves steal a customer's phone, their bad dreams become reality because:

**Theft Aware provides data protection and theft recovery for smartphones.**

It will unveil the thief's identity and enable the customer to remote control his or her phone via SMS. Theft Aware is the only solution in the marketplace that will be completely invisible on the phone, in order to give customers the best chances to either catch the thief or get their device back.
